Sleep Apnea is a Dangerous Condition

Sleep apnea affects more than 22 million Americans who suffer from lack of restorative sleep, many without being aware of their condition.

Typical symptoms include heavy snoring, excessive daytime sleepiness or fatigue, difficulty with concentration or memory, among many others. Untreated, sleep apnea can lead to serious health consequences – increased risk of heart disease, high blood pressure, obesity, diabetes, anxiety & depression, substance abuse, certain types of cancer, automobile crashes, on-the-job accidents, reduced quality of life, and sadly even death.

Sleep Apnea is not well-understood or well treated by the medical community. The American Sleep Apnea Association is working to change this. Won't you join us?

TO BENEFIT: AMERICAN SLEEP APNEA ASSOC

Sleep Apnea

Is a

Dangerous

Condition

INAUGURAL BRYAN LOUIS CHANEY MEMORIAL GOLF TOURNAMENT

FRI MAY 21, 2021
▶ SHOTGUN START AT 9:00 A.M.
GLADE VALLEY GOLF CLUB,
WALKERSVILLE, MD

On August 19, 2020, Bryan Chaney passed away in his sleep due to complications from Obstructive Sleep Apnea. Bryan was 25 years old, engaged to be married, purchasing a house and getting ready to begin his adult life. He was a devoted son, brother, fiancé and friend to many. The loss of his light in our lives was a deep blow. Our sincere hope is to provide education about this condition to prevent another family from ever having to experience what we did.

The American Sleep Apnea Association is a 501(c)(3) tax-exempt, non-profit organization founded in 1990 to help improve the lives of those affected by sleep apnea through education and advocacy. The organization was founded by and for patients and strives to provide affordable treatment options, education for patients and medical providers. They have evolved to add peer mentoring, educational conferences, summits, and podcasts all while continuing programs to assist those in need of medical assistance and finding treatment options.
